plugin suite v1.3.606.0 incl.keygen-r
```

A: The issue seems to be, for some reason, that you are trying to load a .NET assembly as .NET Core does not support System.Core. The error message explains what's happening. I think you're going about this the wrong way, but I don't know what your requirements are so I can't suggest an alternative approach. I'd suggest going the managed route and using System.IO.File.WriteAllText, which works for both .NET Core and .NET Framework, although the .NET Core version is slightly more efficient. Since you're not using .NET Core it should be as simple as replacing this line of code: `using (var stream = Assembly.GetEntryAssembly().GetManifestResourceStream("Acustica Audio Neo Console Plugin Suite V1.3.606.0 Incl.Keygen-R.resources")) { using (var text = File.ReadAllText(stream.Name)) { File.WriteAllText(@"c:\temp\config.txt", text); } }` with something like this: `using System.IO; using (Stream stream = Assembly.GetEntryAssembly().GetManifestResourceStream("Acustica Audio Neo Console Plugin Suite V1.3.606.0 Incl.Keygen-R.resources")) { using (var text = File.ReadAllText(stream.Name)) { File.WriteAllText(@"c:\temp\config.txt", text); } } /* * Copyright (c) Facebook, Inc. and its affiliates. * * Licensed under the Apache License, Version 2.0 (the "License"); * you may not use this file except in compliance with the License. * You may obtain a copy of the License at * * * * Unless required by applicable law or agreed to in writing, software * distributed under the License is distributed on an "AS IS" BASIS, * WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. * See the License for the specific language governing permissions and * limitations under 2d92ce491b`
