nvidia-driver Linux marek-laptop 3.8.0-32-generic #49-Ubuntu SMP Fri Jul 27 17:24:11 UTC 2014 s86_64 s86_64 s86_64 GNU/Linux A: I'm running Ubuntu 14.04.1, but I had to get the same problem. Just to make it clear: after upgrading my system to the current development-branch (Ubuntu 14.10) I had no problems running this program, but when I tried to open it on 14.04 I was getting the error you described. The solution is quite simple: instead of just uninstalling the program you should actually rename it. Just to make it clear: I installed the program using Homebrew and a few other packages. It was called xdg-open. After renaming it (and restarting my computer) I could successfully run the program again.
