
SmartPurger Crack [Win/Mac]

SmartPurger Crack + Full Version (April-2022)

SmartPurger is a reliable and useful application that can purge multiple AutoCAD drawings at top speed with full control. SmartPurger is a batch processing utility that allows you to purge multiple drawings. A Unique feature is that the file time stamp can be restored. SmartPurger handles crashes so the script continues to the end and leaves bad drawings. This is extremely useful before backups and distribution of drawings. SmartPurger is for example useful if you want to minimize the size of files before a backup or before sending drawings by e-mail, burning to CD or just to use as a quick viewer of drawings. You can even save the files to a separate folder or to a different drawing version. SmartPurger can also execute custom script files (.SCR) or AutoLISP files (.LSP,.FAS or.VLX). You can also set up SmartPurger to run different AutoCAD applications for different drawing file versions. Moreover you can specify the profile to be used when starting AutoCAD. From a real project: 1773 drawings and a total size of 526MB in 2000 DWG format become 218MB in 2004 DWG format. Conversion and purging was made totally unattended. Remember that this is a very powerful tool and make sure you understand and know what you do when you use it. Read the manual before you run it. Try on some test files/folders as a start. To be on the safe side make sure you have backups before you run. You can run audit, zoom extents, create preview icons. Convert between versions. Purge Blocks, Dimension styles, Layers, Linetypes, Mline styles, Shapes, Text styles, Plot styles, Page Setups, Filter states, Layer states, Layer manager states (Express Tools), Line objects without length, Text objects without text, embedded VBA code, registered applications collections, Anonymous Groups, Groups. It's possible to restore the date and time of the file to what it was before the scripting. Delete.BAK and other temporary or garbage files. And much more. Limitations: 31 days trial SoftAndSoft.Net Free Simple Web Page Creator is a free and easy to use web design software that allows you to make your own free and commercial websites. You can use your own images, text, shapes, or even clip art. You can even create your own web buttons. You can include your own text, and pictures

SmartPurger Crack Full Version For PC

Users can execute AutoCAD macros with the SmartPurger macro recorder. You can set up macros in drawing files (.DGN,.DWN) or in AutoCAD scripts (.SCR,.LSP) or in AutoCAD applications (.APP). Macros are written in AutoLISP. There are 3 modes to record a macro. The IDE mode records the macro line by line and allows you to easily review and edit the code. The IDE mode can be set up to record the macro in 4 formats: 1. no line numbers, 2. line numbers in format of M23 or S7, 3. line numbers in format of M44 or S8, 4. line numbers in format of M55 or S9. Line numbers in format of M44 or S8 have the ability to record code even when a break occurs, for example, if you stop the code recording by using break. The IDE mode is recommended if you want to edit the code and also if you want to perform detailed recording and analysis afterwards. The Macro mode records the macro in the same format as the code in the IDE mode. You can stop the code recording by using break, you can rewind to a previous point, you can replay the recorded code and you can pause the code recording. The Macro mode is recommended if you want to perform fast and easy macro recordings and you do not need to review the recorded code afterwards. The third mode is the Screenshot mode, it allows you to record the macro without stopping the code recording. When you quit the macro recorder, the code is saved into the file it was recorded to and a screenshot of the recording is saved in the file. You can also choose to save all the recordings into a single file. To help you better understand the usage of AutoLISP in the SmartPurger Macro recorder, it is recommended that you start a Macro mode recording to a file (or a set of recordings to a file), quit the Macro recorder and analyze the recording file. SmartPurger Macro recorder provides the following additional features: automatic saving of the recording file. saving all the recordings at the same time in a single file (or in a single recording file, if all the recording are into a file). saving all the recordings from a specific recording file into a.SCR or.LSP file. sending email notifications to the editor as soon as a recording start or 1d6a3396d6
