- Full-featured application designed to help you create autorun CD menus, file launchers, toolbars, installers, cue cards, slideshows and presentations, tutorials, multimedia albums and other marketing materials. - Its interface is well-organized and offers easy access to options, but beginner users might need to take their time to figure out how things work. The software allows you to build your project using predefined commands, so creating your multimedia application is not just a matter of dragging and dropping components, although a preview of the output is available. - The application comes with several templates that you can use, but you can also create a new project from scratch. Code snippets, bookmarks, parameter and code completion and syntax highlighting are features that can come in handy if you decide to choose the latter option. - Each project component can be customized according to your preferences by editing the properties and thus modifying the output design and functionality. Beginner users can use the 'Quick Edit' menu (opens by right-clicking in the preview mode) to change the colors, modify the cursor type, edit the text and change the position of each item. - Built-in support for Flash and HTML files, predefined controls, video playing functionality, native support for a variety of multimedia file formats, magnifier and a constant evaluating tool are other advantages that this application brings you. - The integrated conversion tool is designed to help you extract APB files from EXE, while the image capturing and editing tool allows you to take screenshots, change their color depth and save them to your computer. In order to avoid further modifications to your code, you can password-protect your project. - When your work is finished, you can compile and run it, export it to various

formats or send it via email for later reference. - Although it is no longer under development, Autorun Pascal Builder is still a reliable software solution that combines ease of use with powerful features to help you create interactive multimedia applications. However, it seems that I cannot upgrade the software because the license is disabled. The license key is "CLXXXX" and the expired date is 6/12/2007. So, I did not have the update activated yet. Is there a way to re-activate the license and to upgrade to the latest version?
